## EXPERIENCE

### Sunrise Mentors Private Limited (Coding Ninjas).....

Teaching Assistant (web development (MERN))

March 2024 - present, Gurgaon, India

#### Teaching Assistant (Web Development)

- In my role as a Teaching Assistant (TA), I successfully provided support in resolving student doubts and evaluating projects as needed.  
I developed strong communication, problem-solving, and student support skills, demonstrating a commitment to enhancing the educational experience.
- Till now I resolved 264 doubts with an overall rating of 4.42/5.00 and evaluated 7 projects successfully in 63 days.

### Ypsilon It Solutions Pvt. Ltd.....

MERN Developer

Feb 2024 - May 2024, Indore, India

expertise in JavaScript programming, crafting a dynamic web application utilizing the MERN stack to facilitate seamless communication among various services, enhancing scalability and reliability.

#### Created portfolio website

- I designed a professional portfolio website using HTML, CSS, and JavaScript, showcasing my skills and projects.
- I have also added feature of a contact form for easy communication.
- The website is responsive, fast, and search engine optimized.

#### Created Node.js API for Bank Project.

(This project is a Node.js API developed for a bank system.)

- It allows users to perform banking operations such as account transactions, transfers, and balance inquiries through a secure API.
- Developed secure APIs with hashed password functionality, ensuring robust authentication and data protection.
- Also implement encryption methods to safeguard user credentials and sensitive information.
- Skilled in testing API endpoints using Postman for seamless functionality and security.

#### E-Commerce API

(This project is a Node.js API developed for a e-commerce platform.)

- Implemented a e-commerce API involving a structured folder system (MVC), route configurations, and a variety of API methods.
- Successfully applied middleware, worked with route and query parameters, and tested API functionalities using Postman.
- Ensured secure API access through JWT token authentication.
- Implemented CORS for seamless front-end interaction and set up logging mechanisms to monitor API activity for debugging purposes

## SUMMARY

With 6 months of IT experience, I have owned my expertise in MERN development, focusing on planning, implementation, design, and architecture within the MERN stack. My skills in MERN development allow me to efficiently create full-stack applications using MongoDB, Express.js, React, and Node.js, demonstrating a strong foundation in web development technologies.

## SKILLS

Languages	Java core
Back End	Node Js
Front End	HTML, CSS, JavaScript
DBMS	MongoDB
OS	Microsoft, Ubuntu
Frame Work	Express Js, Mongoose, React Js
Version Control	Github
Soft Skills	Consistency, Persistence, Enthusiastic

## EDUCATION

Government Engineering College  
Nowgong, Chhatarpur (M.P), RGPV  
University (Bhopal)

(2018-2022)

Bachelor of Technology - civil

CGPA: 7.69/10.00

D.A.V A.C.C Public School, Kymore,  
Katni (M.P)

6-12th CBSE

## LANGUAGES

- Hindi (Native)
- English (Advanced)

## INTERESTS

- Swimming
- Badminton
